Bahram Afsharmanesh

Curriculum Vitae

University of Georgia
Athens, Georgia, USA
Google Scholar | LinkedIn

bahram.afsharmanesh@uga.edu
bafsharmanesh.github.io

Research Interests

High-performance computing and machine learning systems; heterogeneous GPU scheduling and distributed training; GPU kernels and collective communication; communication–computation overlap, quantization, and performance modeling for large language model inference.

Education

University of Georgia 2023–Present
Ph.D. in Computer Science, in progress GPA: 3.95/4.00
Advisor: Prof. Gagan Agrawal.

Sharif University of Technology 2012–2014
M.Sc. in Mechanical Engineering GPA: 3.81/4.00

Iran University of Science and Technology 2008–2012
B.Sc. in Mechanical Engineering GPA: 3.76/4.00

Selected Publications

[1] **Bahram Afsharmanesh**, Md Musfiqur Rahman Sanim, AmirAli Mirian, and Gagan Agrawal. **PhaseAR: Schedule-Aware AllReduce for Tensor-Parallel LLM Decoding**, Under Review.

[2] **Bahram Afsharmanesh**, Md Musfiqur Rahman Sanim, AmirAli Mirian, and Gagan Agrawal. **LiGO: Low-Bit GEMM–AllReduce Overlap for Tensor-Parallel LLM Inference.**, Under Review.

[3] AmirAli Mirian, **Bahram Afsharmanesh**, Md Musfiqur Rahman Sanim, Wei Niu, and Gagan Agrawal. **Fast Sparse Linear Algebra for LLMs with Contextual Sparsity.**, Under Review.

[4] **Bahram Afsharmanesh**, Md Musfiqur Rahman Sanim, AmirAli Mirian, and Gagan Agrawal. **HeteroSched: Co-Optimizing Scheduling and Parallelization for Deep Learning Workloads for Heterogeneous GPU Clusters.** *International Conference on Parallel Architectures and Compilation Techniques (PACT)*, 2026.

[5] Md Musfiqur Rahman Sanim, Zhihao Shu, **Bahram Afsharmanesh**, AmirAli Mirian, Wei Niu, and Gagan Agrawal. **Mask-Aware Execution for Efficient JEPA Training.** *International Conference on Parallel Architectures and Compilation Techniques (PACT)*, 2026.

[6] Md Musfiqur Rahman Sanim, Zhihao Shu, **Bahram Afsharmanesh**, AmirAli Mirian, Jiexiong Guan, Wei Niu, Bin Ren, and Gagan Agrawal. **Optimizing 3D Gaussian Splattering for Mobile GPUs.** *International Conference on Parallel Architectures and Compilation Techniques (PACT)*, 2025.

Selected Presentations

HeteroSched 2026
International Conference on Parallel Architectures and Compilation Techniques (PACT), Chicago, IL.

Professional Service

Technical Paper Reviewer 2027
ACM Web Conference (WWW).
Artifact Evaluation Committee Member 2027
International Symposium on Code Generation and Optimization (CGO).
Technical Paper Reviewer 2027
IEEE International Symposium on Circuits and Systems (ISCAS).

Junior Program Committee Member 2027
ACM International Conference on Supercomputing (ICS).
Artifact Evaluation Committee Member 2027
Symposium on Principles and Practice of Parallel Programming (PPoPP).
Artifact Evaluation Committee Member 2026
International Conference on Parallel Architectures and Compilation Techniques (PACT).

Honors and Awards

Kaggle Silver Medal 2023
AMP Parkinson's Disease Progression Prediction competition; ranked 47th of 1,805 (top 3%).
10th Place, National Student Scientific Olympiad 2012
Mechanical Engineering, Iran.
10th Place, National M.Sc. Entrance Examination 2012
Mechanical Engineering, Iran.
Top 0.2%, Iranian National University Entrance Examination 2008
Ranked 421st among over 200,000 participants nationwide.

Research Experience

Graduate Research Assistant Aug. 2023–Present
University of Georgia; advisor: Prof. Gagan Agrawal

- Designed HeteroSched to jointly optimize scheduling and parallelization for heterogeneous GPU clusters; evaluated with performance simulation and physical experiments.
- Developed CUDA/C++ and MSCCL++ collective-communication kernels, fine-grained communication–computation overlap, and quantized AllReduce for distributed LLM inference over PCIe and NVLink.
- Built microbenchmarks and analytical performance models; used Nsight Systems and Nsight Compute to study synchronization, memory bandwidth, kernel occupancy, and end-to-end performance.

Research Assistant May 2020–June 2021
Amirkabir University of Technology

- Investigated machine learning as a function approximator for numerical PDE solvers; developed MATLAB applications for mechanical-system analysis under static, dynamic, and thermal loads.

Research Assistant Sept. 2012–Sept. 2015
Sharif University of Technology

- Developed PDE solvers in MATLAB and molecular dynamics algorithms in Fortran; used genetic algorithms to calibrate numerical models against molecular dynamics simulations.

Undergraduate Researcher Sept. 2010–Sept. 2012
Iran University of Science and Technology; advisor: Prof. S. M. Hasheminejad

- Solved PDEs for laminated plates using MATLAB and Mathematica.

Industry Experience

Data Scientist Aug. 2021–Dec. 2022
Baroline

- Built spam-detection and named-entity-recognition models with PyTorch, BERT, and scikit-learn; deployed inference APIs using FastAPI, Docker, and Kafka, reducing response latency by 25%.
- Developed data pipelines and warehouses with Airflow and PostgreSQL, and analytics dashboards with Pandas, Streamlit, Power BI, and Metabase.

R&D Engineer Jan. 2016–Apr. 2020
MAPNA PARS Company

- Built MATLAB toolboxes for system identification and eigenvalue analysis; developed regression models to predict component behavior and accelerate engineering design workflows.

Technical Skills

Programming	C, C++, Python, CUDA, Fortran, SQL, MATLAB, Mathematica, Bash
GPU and parallel	MSCCL++, NCCL, CUTLASS/CuTe, Triton, MPI, OpenMP
ML and data	PyTorch, JAX, scikit-learn, NumPy, Pandas, FastAPI, Kafka, Airflow
Performance	Nsight Systems, Nsight Compute, profiling, benchmarking, analytical performance modeling, roofline analysis
Development	Linux, Git, Docker, Make/CMake, CI/CD, AWS, LaTeX
